Living with NARCOLEPSY?

From attending college or graduate school to being in the working world or navigating through everyday situations, managing excessive daytime sleepiness with narcolepsy can be challenging.

If you are fighting to stay awake during the day, **talk to your healthcare provider about WAKIX® (pitolisant).**

Indications and Usage

WAKIX is a prescription medicine used to treat:

- excessive daytime sleepiness (EDS) or cataplexy in adults with narcolepsy.
- excessive daytime sleepiness (EDS) in children 6 years of age and older with narcolepsy.

Why WAKIX® (pitolisant)?

Wakix
pitolisant tablets

Not a stimulant

WAKIX is **not a stimulant**, so the way your body feels when taking WAKIX may be different from medications you have taken in the past.

Once-daily tablet medication

WAKIX tablets are taken **once daily in the morning** as soon as you wake up.

First-of-its-kind

WAKIX is a **first-of-its-kind medication** that increases **histamine** levels in the brain.

Not a controlled substance

WAKIX is the first and only FDA-approved treatment for people with narcolepsy that is **not a controlled substance**.

Important Safety Information

WAKIX can cause a change in the electrical activity of the heart known as QT prolongation. This is a heart rhythm problem that can lead to an abnormal heartbeat. You have a higher chance of getting QT prolongation if you have certain heart or other medical conditions, or if you take WAKIX with certain medicines. Tell your healthcare provider right away if you have a change in your heartbeat or if you feel dizzy or faint while taking WAKIX.

Tell your healthcare provider about all your medical conditions, including if you have any heart, liver, or kidney problems, or problems with blood levels of your electrolytes, such as potassium or magnesium.

What Else Should I Know About WAKIX® (pitolisant)?

No significant drug interactions with sodium oxybate or modafinil

In a clinical study in adults where WAKIX was taken with sodium oxybate or modafinil, there were **no significant effects** on the levels of the medications in the body.

- Tell your healthcare provider about all the medicines you take or plan to take

May reduce effectiveness of hormonal contraceptives

Hormonal birth control methods may not work while taking WAKIX.

- People who can become pregnant should use an alternative non-hormonal birth control method during treatment with WAKIX and for at least 21 days after stopping WAKIX

Are you currently in college?
